

LEAD SAFE Building Maintenance Practices

One-Day Training for Contractors, Property Owners and Homeowners

HUD Approved • Satisfies NJ mandated property maintenance code requirements for Lead Safe Building Maintenance Practices • Critical information for the 'do-it-yourself' handyman.

Attention Property Owners – Learn to Live Safely with Lead-based Paint.

If you perform maintenance and/or repair work on your own home, there are some important work practices you need to know to work safely with lead-based paint. If you are a multiple dwelling (3 or more) owner, this training will satisfy the Lead-safe building maintenance requirements under the New Jersey Multiple Dwelling Property Maintenance Code (N.J.A.C. 5:10) which requires all persons, including property owners, contractors and maintenance staff who perform work on pre 1978 housing become certified in Lead Safe Building Maintenance Practices (LSBMP). This course includes dust wipe sampling training which must be performed in multiple dwellings following repair or maintenance activities.

Sponsored by

Southern NJ Perinatal Cooperative
with funding from the
NJ Department of Community Affairs/
Lead Education and Outreach Program

Presented by

LEW Corporation
